Joint Waste Collection – School and Community

Every spring there is a joint waste collection activity in our community. Students of our school collect waste together with members of the local youth

welfare office. The call is always for a Saturday morning and in the end there is a picnic as a kind of reward. The action covers the area of the community along the rivers, hiking trails and public cycle tracks. The students don't get any money but the good feeling of having contributed to a cleaner environment! A photo exhibition is always shown in the entrance hall of our school to

encourage other students to take part in the years to come. This year's activity will be 12Th March.
