

## LAST PROJECT MEETING IN ITALY

From May 22nd to 25th 2016 the final project meeting took place in Oppido .

It focused on summing up the results of the activities of the last period of the project and thus giving contributions to the final report .

We met the Mayors of the area, local journalists , parents and representatives from the nearby schools .

From the meetings came up that the participants were very happy with the ongoing project " ready-set-go as happy Europeans after school" whose main aims overmatched the expectations of all people involved ; they expressed great committment and appreciation of the actions promoted.

Together with all the partners we discussed the follow- on activities and how to implement them in the years to come .

We agreed in guaranteeing further support on the website for at least five years after the end of the project and in continuing supporting the achievements and promoting its implementation.

We designed a calendar for 2017 with photos of the various activities taken during the project period and spread a great number of copies locally and to the partners. Thus a lot of people will be reminded of the project throughout 2017.
