

Job information centre

At the beginning of career orienteering we visit the job information center in Hamelin. The job orienteering center provides a great choice of media that help students with finding an adequate job. That does not mean that it provides addresses of companies, schools, universities and organizations offering training, studies or apprenticeships in the first place, but it rather provides all kinds of information about jobs. Qualifications students need, earnings, working conditions, abilities, availability in the region and many more. Checking and assessing all these preconditions students will be able to match their expectations and the offers available.

Some of our students are working together with their Italian partners in the job information center in Hamelin. They are filling in a form with questions concerning job information. The forms are also to be found on the website
In the background you can see folders, info-posters,

booklets and all kind of material besides computers that students have available for their information. On the project website you will also find a short video explaining the different sections of the job information center. Katharina and Tessa will take you on a virtual tour round.

Of course not all of the partners have comparable opportunities in their communities or regions. So what can they do? You can establish a room where you have got internet access and use it as you school job information center. By and by you can collect all kind of job information material and make it available to the students. For first job information enquiries you can use the questionnaire for the job information center provided on the project homepage. This is not inevitably combined with new costs and a lot of additional efforts just use the material and the resources you already have.

We have a career counseling room where the students meet the career counsellor for interviews. But we also use it for all kind of job and career orienteering so for us it is a kind of small job orienteering center. We provide booklets, internet access and as you can see posters and various leaflets from vocational schools, companies, colleges and many other institutions.
