

Presentation of Internship Experiences

Altogether 27 different jobs were presented by the students of grade 9 during the job presentation day. For two lessons in the morning the students reported about their personal experiences, explained steps of job training on posters and showed, wherever possible, examples from what they had been doing during their 3 week internship. In a kind of job fair they had prepared small stalls where they gave information in teams or alone, provided general facts about the job they had done, showed their internship reports and answered all kinds of questions.

Target group were the students of the grade 8 who will do their internship the following year. In small groups they wandered around and tried to stop at as many stalls as possible to get advice and information and of course in first place at the job they considered most desirable.

Schedule:

some periods ahead of the presentation	prepare presentations, arrange things within the teams...
2. Period	establish stalls, get chairs, fix posters
3.+4. Period	pass on information to 8 th grade students
part of period 5	remove everything
